OPSIS CEMS

Continuous Emissions Monitoring for Marine Compliance. Confidence in Compliance. Performance You Can Trust.

In today's regulatory environment, proving compliance is just as important as achieving it. The Consilium OPSIS CEMS solution delivers continuous, real-time emissions monitoring that helps ship operators verify scrubber performance, maintain compliance, and optimise operations.

RELIABLE COMPLIANCE MONITORING

Accurate, continuous measurement of key emissions parameters provides documented proof of compliance with international environmental regulations.

BUILT FOR HARSH MARINE CONDITIONS

Designed to operate in demanding exhaust gas environments where traditional monitoring systems often struggle, ensuring dependable performance over time.

MAXIMISE UPTIME

A low-maintenance design reduces service requirements and minimises the risk of downtime, helping vessels stay operational and compliant.

OPTIMISE SCRUBBER PERFORMANCE

Fast response times enable operators to monitor and adjust scrubber performance more effectively, supporting efficient operation and reduced energy consumption.

LOWER LIFECYCLE COSTS

With fewer components, simplified installation, and reduced maintenance requirements, OPSIS CEMS helps lower the total cost of ownership throughout the system's lifetime.

PROVEN MARINE EXPERIENCE

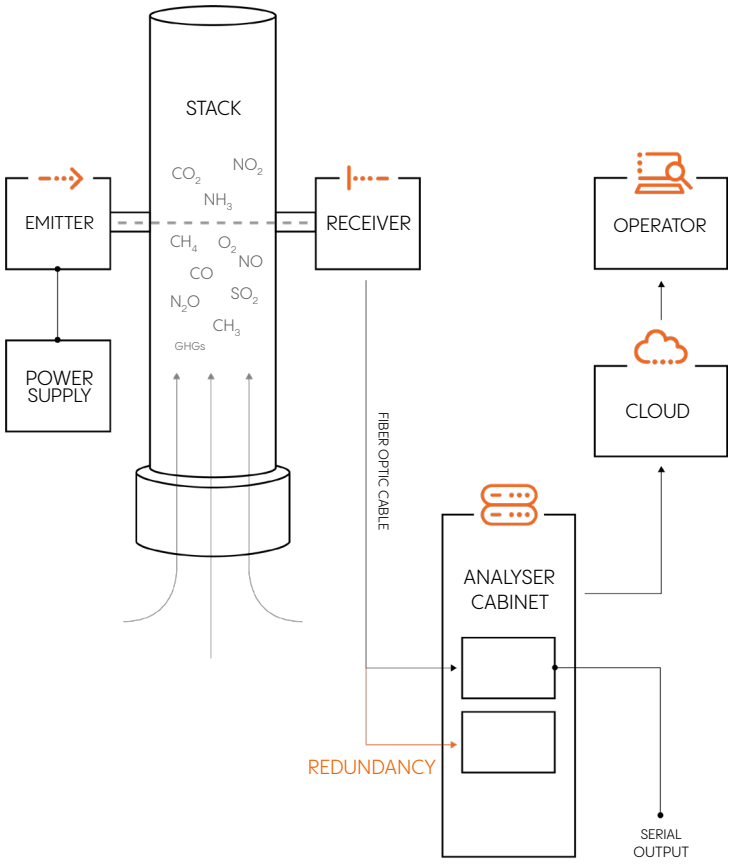

Trusted by vessel owners worldwide and supported by decades of emissions monitoring expertise.

GLOBAL SERVICE AND SUPPORT

Wherever your vessel operates, Consilium provides worldwide support through a global network of service engineers and technical specialists.

KEY BENEFITS

- Continuous emissions compliance verification
